

“ The only clinic in the region to offer the Celliss treatment that is making waves worldwide thanks to its advanced technology and visible results ”

Frame by Sarah Battikha Dermatology Clinic
349 Al Wasl Road – 122640 Dubai, UAE

The new year is almost upon us and if you are looking to up your wellness game and indulge in a little self-care to begin 2023 in style, looking and feeling the best version of yourself, help is at hand with Frame by Sarah Battikha, a celebrated dermatology clinic nestled in a beautiful, contemporary space on Al Wasl Road, Jumeirah 1.

Using the latest technologies and a little European savoir-faire, Frame by Sarah Battikha brings a personalised and human experience allowing all patients to receive the very best results possible. For those looking for a true result-driven procedure designed to contour the body and minimise troublesome cellulite, the world-renowned Celliss treatment could be just what you've been looking for. Frame by Sarah Battikha is the only clinic to offer the treatment in the region, which carefully treats 5,000 square centimeters of body surface simultaneously.

Offering a new technological approach, Celliss is radically innovative, more effective than any other and is based on a patented process called 'Total Slimming System (TSS)' that involves a non-invasive suction and percussion practice that simultaneously treats thighs and hips, as well as buttocks or abdominals, depending on the client's position. The speed and intensity of this unique treatment can be adjusted to suit each client's needs with the percussion generating a mechanical shock wave that mobilises and compresses fat, whilst stimulating the body's natural detoxification process.

Some of the benefits of Celliss are a slimmer figure, a reduced appearance of cellulite, and lighter-feeling legs. Clients can enjoy more sculpted buttocks and thighs, a toned stomach, and a smoother skin texture. The treatment can also assist with rejuvenating the complexion and boosting lightness while redesigning your silhouette.

One session is recommended every 24 hours and depending on the body type, patients can expect to start losing centimeters from their seventh session, with drainage results being immediate.

Patients at Frame by Sarah Battikha can benefit from complimentary free parking in front of the clinic, with appointments available within clinic opening hours: Monday to Saturday – 10:00 am – 7:00 pm.
